

Do you or a loved one have: A spinal cord injury, a traumatic brain injury or a stroke?

Does the person with one of these diagnosis live in a rural community?

If so we would like to talk to you or your loved one about important topics such as:

- What health problems are a priority for your?
- Where do you go to get health information?
- How much does health research influence your healthcare decision making?

If you take part in the project you would be asked to take part in a 90 minute focus group discussing these topics with approximately 7 other people.

You will receive a \$20 gift card for your participation.
