

Contract Sample  
Physician Assistant-Survey Research  
3 credit hour

#### Goals/Objectives

This is an opportunity for an undergraduate student to receive academic credit on an IRB approved survey research project. The purpose of this study is to explore cohorts of physician assistant studies with existing standardized patient data. The student will gain experience on a small research team and expand his/her knowledge in interpretation and dissemination of survey research.

#### Tasks for completing objectives (with timelines)

1. Research course overview of expectations and materials; CITI Training completed; draft of research contract
2. Meet with faculty mentor and research director
3. Review all materials; review data (pending IRB approval added to key personnel)
4. Analyze/summarize standardized patient data
5. Meet with faculty to review publication criteria
6. Prepare electronic submission

#### Criteria, with percentages, for Assessment

- Completion of CITI Training
- Review existing standardized patient data
- Summarize data
- Review publication criteria
- Assist in electronic submission
