Contract Sample
CSD- Qualitative Research
1 credit hour

Goals/Objectives
Student will use the computer program NVivo to compare and contrast information regarding mental health in Ecuador. This will be done by specifying shared attributes of the data and linking them to each other to help form a comprehendible picture of the results. Then, this compiled information will be charted and graphed to form figures for manuscript preparation.

Tasks for completing objectives (with timelines)
1. Organize pertinent data into proper tree nodes.
2. Categorise specific attributes that link the tree nodes together to form meaningful conclusions.
3. Create charts and graphs reflecting information.
4. Communicate with faculty members as needed about project progression.

Criteria, with percentages, for Assessment
- Attendance: 25%
- Task completion: 50%
- Maintain communication 25%
