

# Influential Themes in Clinical Practice: Insights from 50 Years of UKPA Alumni

# INTRODUCTION

The University of Kentucky Physician Assistant (UKPA) program, celebrating its 50th anniversary in 2025, has been a key contributor to the PA profession both locally and nationally. As the oldest PA program in Kentucky, its 1,768 graduates have made significant impacts across diverse healthcare settings. This research aimed to explore the experiences of UKPA alumni to identify key factors in the program that influenced their clinical practice. By reflecting on these alumni perspectives, this study seeks to identify areas for growth and improvement, ensuring the program's continued success as the PA profession evolves to meet the demands of modern healthcare.

# **PURPOSE OF STUDY**

The purpose of this study is to identify common influential themes among UKPA alumni regarding their experiences during the program and in clinical practice, allowing the program to implement meaningful improvements to better prepare future physician assistants (PAs) for the evolving healthcare landscape.

# **METHODS**

- Qualitative exploratory study using semi-structured oral interviews conducted via audio Zoom calls.
- Participants (n = 5): UKPA alumni from the past 50 years, selected through convenience sampling from the UKPA Alumni Association Database.
- Eligibility: Alumni who practiced as PAs post-graduation, English-speaking, and 18 years or older.
- Interviews: Approximately 30 minutes, audio-recorded for accuracy and data collection.
- Thematic analysis conducted to identify recurring patterns and primary themes.

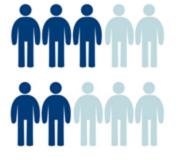

*"The faculty really pushed"* us to do our best. Bob Wildman, Doris Rapp, Glenn Combs—they were always there, motivating *us.*"

"... (my preceptor) taught *me more about patient care* than just medicine—he showed me the importance of truly caring for people."

Nicolas Beltran, Madelyn Burgess, Olivia Goerdt, Allison Houk, & Makayla Wright Faculty Mentor: Hannah Anderson, MSPAS, PA-C

### RESULTS

## 1.Why PA:

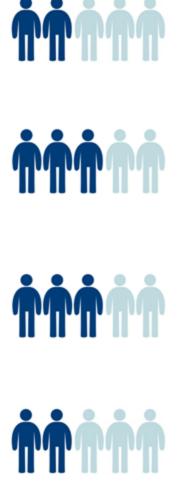

60% mentioned shorter training compared to other medical professionals. 40% stated that their motivation stemmed from a desire to help others through medicine.

# **1.UKPA Experience:**

60% identified community with classmates as their most fond memory. 40% of respondents wished for more interprofessional interactions. 40% wanted more hands-on skill training incorporated into the curriculum. 80% recalled specific names/moments that had a lasting impact on them.

# **1. Practicing as a PA:**

40% noted rotations emphasized patient-centered care beyond the medical aspect, and 40% expressed their rotations helped them feel capable of treating patients independently. 60% secured their first post-graduation job through a clinical rotation site, and 60% prioritized a supportive learning environment.

60% now experience a team-based dynamic with their attending physician, and 60% reported having a social and professional relationship with their current attending. 40% emphasized the importance of advocacy for PA laws and professional rights.

> **Greenville, South Carolina Class: 2019** Years of Experience: 6 Speciality: Facial Plastic Surgery

Cincinnati, Ohio **Class:** 1984 Years of Experience: Over 40 Speciality: Pain Management

#### **Glasgow**, Kentucky Class: 2000

Years of Experience: 25 Speciality: Emergency Medicine

#### **Greenup**, Kentucky Class: 2015 **Years of Experience:** 9 Specialty: Health and Wellness

#### Tanzania, Africa **Class: 2014 9** Years of Experience: 10 Specialty: Hospital Medicine

# DISCUSSION

- 1. Community & Camaraderie:

- **1.** Advocacy for the PA Profession:
  - reimbursement.
- potential.
- 1. Hands-on Training:

# Areas for Growth

- Need for stronger advocacy training to empower PAs in healthcare policy.
- Expanding hands-on training will better prepare students for clinical demands.

# CONCLUSION

#### Implications for PA Education:

- practice.
- Integrating advocacy education will help equip future PAs with the skills needed to navigate policy and professional challenges.
- Collaborative learning environments can enhance peer and faculty support

### **Contributions to the Literature:**

- professional practice.
- comprehensive evaluation of training efficacy.

#### **Study Limitations:**

- diverse experiences of all UKPA graduates.
- limits generalizability.

#### **Future Research:**

- identify best practices for PA education.
